Student Learning Outcomes for the course:

Outcome 1: Evaluate real-world situations and distinguish between and apply exponential, logarithmic, rational, and discrete function models appropriately.

Outcome 2: Analyze, interpret, and communicate results of exponential, logarithmic, rational, and discrete models in a logical manner from four points of view---visual, formulaic, numerical, and written.

Course Description: Application of exponential and logarithmic functions, rational functions, and sequences and series to problems. Emphasis on the development of models of real life applications and interpretation of their characteristics.

Text: Robert Blitzer, “*Intermediate Algebra* for college students”, 5th edition, Pearson, 2009.

Related Materials: pencils, ruler, eraser, stapler, and pencil sharpener. **Bring your textbook, notes, and all related material every day!!!**

A graphing calculator TI-83+, or TI-84+, or TI-84 is recommended. For demonstration purposes one of these calculators will be used in the class. If you have another calculator, which you know how to use, you may use it.

Pre-requisite: Qualifying score on the Math Placement Test within the last calendar year; or MATH 212 with a grade of C or better.

Class rules: **You are expected to attend all classes on time.** If you miss 3 class meetings you may be dropped from the class. (No walking in and out, please). Private conversations during class are not permitted. Cell phones and pagers should be turned off. Cheating is not tolerated. **Please respect other students’ right to learn!**

Homework: Reading each section before class helps you understand the lecture. Your written homework (HW) for each class will be assigned problems in the section covered in class and is due at the beginning of the next class period. You must **show your work** to get credit. Your HW should be written thoroughly with all steps shown, in well organized manner using pencil #2 and lined 8.5x11” paper. About 80% of your homework assignment will be collected and graded on completeness.

Quizzes: There will be about 15 quizzes. No make up for missed quizzes. The lowest 2 scores will be dropped.

Tests: There will be three (3) tests worth 100 points each. Material from any lecture, homework assignment, or quiz can appear as a test question.

The tentative schedule (subject to revision) of tests and the material covered is the following:

Test 1: Jan 26, Sec. 6.1-6.8

Test 2: Feb 22, Sec. 7.1-7.6, 4.2, 4.3, 10.1

Test 3: March 11, Sec. 9.1-9.6

Makeup Tests: There are no make-up tests, *under any circumstances*. If a test is missed, the percentage on the final exam will replace the score of the missing exam. If a second exam is missed, the grade will be a zero.

The lowest score of 3 regular tests will be replaced by a percentage on the final exam, provided the latter is higher.

Final Exam: There will be a mandatory comprehensive two-hour final exam worth 150 points, and this exam *must* be taken during the scheduled exam time on Monday, March 21, 11:30am-1:30pm, in E36.

Attendance: You are expected to attend all classes on time. If you miss 3 class meetings, you may be dropped from the class. However this is your responsibility to drop the course officially if you decide not to attend any longer.

Final Grade: Your final grade will be determined based on the following:

Grading Scale:

Quizzes	150 pts	X \geq 731 (97.5%)=A+	X \geq 543 (72.5%)=C+
Test 1	100 pts	X \geq 693 (92.5%)=A	X \geq 487 (65%)=C
Test 2	100 pts	X \geq 675 (90%)=A-	X \geq 450 (60%)=D+
Test 3	100 pts	X \geq 656 (87.5%)=B+	X \geq 412 (55%)=D
HW	150 pts	X \geq 618 (82.5%)=B	X \geq 375 (50%)=D-
		X \geq 600 (80%)=B-	X < 375 (50%)=F
Final Exam	150 pts		
Total Points	X=750 pts		

Missing one of the major tests is made up through added weight on the comprehensive final exam. Missing additional test results in a score of zero.

***** NO OTHER MAKE-UPS WILL BE GIVEN*****

A grade of "I" (incomplete) will be given at the instructor's discretion, if:

- i) A student has successfully completed at least 75% of the course work, and
- ii) has shown acceptable evidence which justifies his/her incomplete work.
